SKILLS SUMMARY

Programming: Python, SQL

Generative AI & LLMs: Large Language Models (LLMs), Generative AI, RAG, Prompt Engineering, LLM Automation

Machine Learning & Deep Learning: Machine Learning, Deep Learning, NLP, Computer Vision, Transformers

Frameworks & Libraries: PyTorch, TensorFlow, scikit-learn, Hugging Face, XGBoost, LangChain

LLM Tools: Claude CLI, Claude Opus 4.5, Ollama

Web & API Development: FastAPI, Streamlit, React

Tools & Platforms: Docker, Git, n8n, Jupyter Notebook

PROFESSIONAL EXPERIENCE

AI Automation Engineer, Modicare Limited, New Delhi

July 2025 – Present

- Designed and deployed AI automation pipelines for firewall log analysis and customer feedback processing using Python and LangChain-based LLM workflows.
- Built automated classification, sentiment analysis, and real-time alerting systems integrating LLM APIs, REST services, and Telegram bot notifications.
- Implemented workflow orchestration with n8n to process and route operational data in near real time.

Data Science Intern, Pinnacle Corporation, Remote

Jan 2025 – Apr 2025

- Developed ML models for clustering and forecasting on sales and healthcare datasets using Python and scikit-learn.
- Built end-to-end data pipelines including preprocessing, feature engineering, model training, and reporting automation.

SQL Developer Intern, Amar Ujala, Noida

Jul 2023 – Aug 2023

- Developed optimized SQL queries and automated reporting pipelines for internal dashboards, improving data accuracy and reducing manual reporting.

PROJECTS

Firewall Network Usage Monitoring & AI Log Intelligence

- Built an AI pipeline to ingest and analyze Fortinet firewall logs via REST APIs.
- Applied LLM-based analysis to classify events, detect anomalies, and identify high-risk security incidents.
- Generated structured summaries and automated real-time alerts for critical events.
- Tech:** Python, REST APIs, JSON, OpenAI API, n8n, Telegram API

Enterprise Knowledge Assistant using RAG

- Built a RAG-based chatbot for querying enterprise documents and PDFs using LangChain and ChromaDB.
- Implemented document ingestion, semantic chunking, embedding generation, and vector retrieval for context-aware responses.
- Improved retrieval quality using MMR search and metadata filtering for multi-document querying.
- Tech:** Python, LangChain, ChromaDB, OpenAI API, Vector Embeddings

EDUCATION

Deenbandhu Chhotu Ram University of Science and Technology (DCRUST)

Murthal, Sonipat

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

2022 - 2025

Honors in Artificial Intelligence and Machine Learning

Ch. Devi Lal Government Polytechnic College

Sirsa, Haryana

Diploma in Electrical Engineering

2019 - 2022

CGPA: 8.84

ACHIEVEMENTS AND CERTIFICATIONS

- SQL Gold Badge** – HackerRank: Recognized for advanced SQL problem-solving skills.
- ML Training** – IIT Roorkee: Completed a 1-week project-based Machine Learning training.
- ML Certificate** – Udemy (Krish Naik): Completed coursework on ML algorithms and practical applications.
